Question 1 17 pts

We emit in the _____ radiation

red

radio wave

UV

Infra red

Question 2 17 pts

We human emit on average energy at a rate of 100J/s (100W) so we are like a 100W light bulb.

How come we are not burning hot like a light bulb?

hint: elephants have large ears. Don't they? why?

☐

We don;t run on electricity

☐

We can't emit that much. We would be on fire

☐

We have no tungsten filament in our head

☐

We have a larger surface area

Question 3 17 pts

Who built a huge lever with a claw at the end to sink boats.

☐

Einstein

☐

Archimedes

☐

Newton

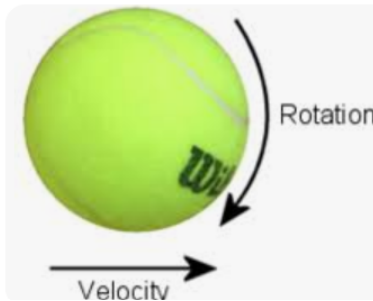

☐

Aristotle

Question 4 17 pts

If you play tennis, a top spin will

- ☐ will not change the trajectory of the ball
- ☐ deflect the ball down
- ☐ there is no such thing as a top spin. only underspin.
- ☐ will deflect the ball up

Question 5 17 pts

When a fluid flows through a *constricted* passage, it accelerates and the pressure in this constricted part

(Bernouilli effect)

- ☐ decreases
- ☐ there is not pressure involved
- ☐ stays the same
- ☐ increases

Question 6 17 pts

In a rotating frame of reference, the force that seems to deflect objects and that makes the storms in the Northern Hemisphere spin counterclockwise is called the

- ☐ coriolis force
- ☐ force of gravity
- ☐ normal force
- ☐ magnus force

Question 7 2 pts

bonus

In a strong gravitational field.

☐

time speeds up

☐

time slows down

☐

time is an universal constant. no change

☐

no one knows
